Major Improvement Recommendations

1

Enhanced Player Controls

Redesign playback controls with larger touch targets and clearer visual feedback. Add gesture controls for volume and track seeking. Include haptic feedback for better interaction confirmation.

2

Improved Language Integration

Implement seamless language switching without requiring app restart. Add language preference to onboarding flow. Ensure consistent bilingual experience across all features.

3

Streamlined Purchase Flow

Simplify the purchase process with fewer steps. Add clear pricing information earlier in the flow. Implement better progress indicators and confirmation messaging.
